...because healthy animals generate healthy profits

KOMBICID

Broad spectrum disinfectant

Description:

Highly effective, broad-spectrum disinfectant for the animal health sector based on glutaraldehyde and quaternary ammonium compound in optimal synergistic balance. The product is developed for use in livestock industry: poultry, swine, cows, sheep, goats, mink, and other related industries.

Properties:

Powerful, foaming disinfectant for the sanitation and disinfection of barns, animal transport, footwear, and all related surfaces and equipment in livestock sector. To be used after proper cleaning with detergent. **KOMBICID** ensures an efficient kill of a full spectrum of pathogenic micro-organisms: bacteria, yeast and viruses. It is developed for surface disinfection and aerosol disinfection.
Used in the control off emerging disease outbreaks.
Intact efficacy in a wide range of ambient and surface temperatures.
Highly concentrated, to be used at min 0.5%.
Safe for use on the predominantly used materials for construction of and installations for animal husbandry (plastics, aluminum, steel coatings, concrete….) if applied according to the instructions for use. Tested according to international biocidal standards: EN1656, EN14349, EN1657, EN16438, EN14675, UK APHA. Clear,colourless to pale yellow disinfectant.

Presentation:

1 liter, 5 liter, 20 liter drum (H.S. Code 3808 9410)

Safety instructions and storage conditions:

Use biocides safely. Before use, read the label and the information concerning the product.
Consult the most recent SDS.
The specified uses and registered claims for the product may vary from country to country.

Instructions for use:

Prior to applying **KOMBICID**, it is recommended to clean the surfaces, equipment or vehicles properly, as it facilitates a perfect disinfection, meeting all international standards for validation.

Surface disinfection:
- Check all surfaces are cleaned and dry.
- Disinfect the surfaces by applying a 0.5- 0.75 % solution of **KOMBICID** (500-750ml per 100L of water). Only use higher concentrations when circumstances/local standards require.

- Do not rinse of earlier then 30 minutes post applying.

Vehicle disinfection:
- Check all surfaces are cleaned and dry.
- Disinfect the surfaces (cargo area, outer surface, and wheels) by applying a 1,25 % solution of **KOMBICID** (1250 ml per 100L of water). Only use higher concentra-tions when circumstances/local standards require.

- Do not rinse of earlier than 5 minutes post applying.

Aerosol disinfection:
- Disinfect the surfaces (cargo area, outer surface, and wheels) by applying a 20% solution of **KOMBICID** (1L + 4L of water) per 1000 cubic meter.
- Use higher concentrations when circumstances/local standards require.

Safety instructions and storage conditions
Use biocides safely. Before use, read the label and the information concerning the product.

Consult the most recent SDS.
The specified uses and registered claims for the product may vary from country to country.

Composition:

Glutaraldehyde(111-30-8): 12.5%
Alkyl(C12-16) dimethylbenzyl ammonium chloride(68424-85-1) : 17.5%
Didecyl dimethylammonium chloride (7173-51-5) : 8%
